This filing responds to an RFAI dated 3/20/2013 in which the Commission requests clarifying information as to why the amended October Quarterly report shows an increase of \$25,000 in receipts over the original report.

During the reconciliation of its accounts in preparation for the Post-General report, the Committee discovered that it had omitted one receipt in the amount of \$25,000 from its October Quarterly report. The amended report corrected this omission. The Committee amended its report as soon as it discovered the error.
